## WHAT WE DO

ALL HANDS ON DECK 360, project number 2022-1-ES01-KA220-VET-000087373, is a European project funded by the Erasmus+ programme, with duration from December 2022 to January 2025.

It brings together a Consortium of 5 partners from Spain, Italy, Germany, Belgium, Coordinated by CETEM (Spain).

The AHOD360 project aims to revitalize the shipwright workforce through immersive learning experiences. By leveraging innovative, technology-based learning opportunities, the project seeks to make the shipbuilding profession more attractive and ensure the preservation of the wealth of knowledge held by experienced experts.

## LAUNCH OF SHIPWRIGHT COLLABORATIVE PORTAL

### Workpackage 2

AHOD360 launched the shipwright collaborative portal

<https://ahod360.infoproject.eu/community/register>.

The portal serves as a dynamic platform that enables professionals and learners across Europe to share knowledge, ask questions, and exchange ideas, fostering a vibrant community dedicated to boatbuilding.

Key features of the collaborative portal:

- **Digital Stakeholder map:** Explore a map featuring over 300 organizations that play an important role in boatbuilding in Europe. These include boatyards, shipyards, museums, cluster organizations, boat building schools, and more. Each entry provides a brief description of their role and activities, along with a link to their website.
- **Discussion forums:** Engage with shipwright enthusiasts through discussion forums. Whether you want to share your latest project,

All Hands on Deck

- **repost to questions from students and learners, or simply connect with like-minded individuals,** the portal offers a space for open and collaborative dialogue.
- **Networking opportunities:** Connect with shipwrights, shipyards, and learners from across Europe. The Shipwright Collaborative Portal provides a space to strengthen contacts and relationships between boatbuilding professionals and enthusiasts, facilitating the exchange of knowledge and know-how.

The use of the portal is completely free of charge. Only registration is required for access.

## SERIES OF ONLINE WORKSHOPS IN 5 MEDITERRANEAN AREAS

### Workpackage 2

To explain the users how to register, login and use the different functions of the Shipwright Collaborative portal, the project has organized a set of online workshops.

There were in total 7 workshops held by the project during September – November 2023.

They welcomed enthusiastic participants passionate about the traditional boatbuilding craft. The majority of participants came from shipwrights and from colleges and universities in wood and furniture technologies from all around Europe, as well as from heritage and promotion organizations.

## EXPERIENCE DIGITAL SHIPYARDS IN VIRTUAL REALITY

*Workpackage 4*

As part of the All Hands on Deck 360 project, virtual 360-degree tours of shipyards in various maritime areas are being designed. There, learners can discover multimedia content, watch videos, explore tools and test their knowledge in a fun way. This interactive learning environment offers a unique learning experience!

## AUDIOVISUAL TERMINOLOGY DATABASE

*Workpackage 3*

We are working on the AHOD360 European Audiovisual Shipwright Multilingual Terminology Database. This database will be a comprehensive resource featuring up to 1000 terms, detailed descriptions, captivating images, voice notes, and translations in five languages: English, Spanish, German, Italian, and French.

From keel to rigging, every aspect of shipwright craftsmanship is going to be meticulously defined. Our database ensures you have access to a rich array of terms that form the backbone of maritime construction.

Stay tuned for more news!
